1. Identification

1.1. Product identifier

Trade name Protectosil® ANTIGRAFFITI SP

1.2. Recommended use of the chemical and restrictions on use

Relevant applications identified For industrial use

for professional users anti-graffiti coating

Surface treatment of porous minerals

Treatment of mineral surfaces

1.3. Details of the supplier of the safety data sheet

Company Evonik Corporation USA

299 Jefferson Road

Parsippany, NJ 07054-0677

USA

Telephone 973-929-8000

Telefax 973-929-8040

Email address Product-Regulatory-Services@Evonik.com

Services

2. Hazards identification

2.1. Classification of the substance or mixture

Classification according to Regulation 29CFR 1910.1200

Remarks Not a hazardous substance or mixture.

2.2. Label elements

Statutory basis Classification according to Regulation 29CFR 1910.1200

Remarks Not a hazardous substance or mixture.

2.3. Other hazards

See chapter 7.1

3. Composition/information on ingredients

Protectosil® ANTIGRAFFITI SP

Version 5.2 / US Revision date 10/19/2018 11/16/2018

Material no. Specification 151764 Print Date Order Number Page 2/10

Other information

This product contains a component that is subject to TSCA Significant New Use Rule (SNUR) which limits the application of the substance to surfaces via brush or roller.

The US EPA has issued a TSCA 5(e) Consent Order that allows for spray application of the product with a requirement of a respiratory program and a monitoring program.

These requirements can be fulfilled in collaboration with Evonik Industries. If a product containing the regulated component is distributed further, the distributor is required to communicate the Consent Order requirements to the downstream users.

4. First aid measures

Description of first aid measures 4.1.

Inhalation

If aerosol or mists are inhaled, take affected persons out into the fresh air. In case of persistent discomfort or other symptoms, consult a physician immediately.

Skin contact

Immediately wash skin with soap and plenty of water. Remove contaminated clothing. Obtain medical attention immediately if symptoms occur. Wash clothing before reuse.

In case of contact, immediately flush eyes with plenty of water. Obtain medical attention if irritation develops.

Ingestion

If accidentally swallowed, rinse mouth thoroughly with water and afterwards, drink plenty of water. In case of discomfort, obtain medical attention.

4.2. Most important symptoms and effects, both acute and delayed

Symptoms

None known

Hazards

None known

Indication of any immediate medical attention and special treatment needed

After absorbing large amounts of substance:

administration of activated charcoal.

Acceleration of gastrointestinal passage

5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media: water spray, foam, Carbon dioxide (CO2), dry powder

Unsuitable extinguishing media: High volume water jet

Special hazards arising from the substance or mixture

Standard procedure for chemical fires.

Advice for firefighters

Water used to extinguish fire should not enter drainage systems, soil or stretches of water.

Ensure there are sufficient retaining facilities for water used to extinguish fire.

Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

US-GHS(R11/011) / 16.11.2018 17:53

Protectosil® ANTIGRAFFITI SP

Containers can build up pressure if exposed to heat (fire). Cool with water spray. As in any fire, wear self-contained, pressure-demand breathing apparatus (MSHA-NIOSH approved or equivalent) and full protective gear.

In case of fire: wear a self contained respiratory apparatus

As in any fire, wear self-contained positive-pressure breathing apparatus, (MSHA/NIOSH approved or equivalent) and full protective gear.

6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Use personal protective equipment.

6.2. Environmental precautions

Obey relevant local, state, provincial and federal laws and regulations. Do not contaminate any lakes, streams, ponds, groundwater or soil.

6.3. Methods and material for containment and cleaning up

Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).

Additional advice

Remove sources of ignition and ventilate area.

7. Handling and storage

7.1. Precautions for safe handling

Avoid breathing aerosol. This may cause respiratory complications. Please refer to our web site: www.protectosil.com Spray applications in building protection: Please observe our instructions for use in our product information/technical data sheets; available at www.protectosil.com

Benefit from our "Technical Training Program" If a product contains this active substance and is resold again, the distributor shall have to assure that this information will be communicated to the subsequent users. Avoid contact with eyes, skin and clothing. Use with adequate ventilation. Avoid breathing vapor of

users. Avoid contact with eyes, skin and clothing. Use with adequate ventilation. Avoid breathing vapor or mist. Follow all MSDS/label precautions even after container is emptied because it may retain product residues. Wash thoroughly after handling.

7.2. Conditions for safe storage, including any incompatibilities

Storage

Keep containers tightly closed in a cool, well-ventilated place.

Further information

Keep tightly sealed in original packing.

Protect from frost.

8. Exposure controls/personal protection

8.1. Control parameters

Other information

Contains no substances with occupational exposure limit values.

8.2. Exposure controls

Engineering measures

Provide for good ventilation if vapours/aerosols are formed.

Personal protective equipment

Respiratory protection

A full face NIOSH-approved respirator with APF of 1000 is required.

A respiratory protection program that meets OSHA 1910.134 and ANSI Z88.2 or applicable federal/provincial requirements must be followed whenever workplace conditions warrant respirator use. NIOSH's "Respirator Decision Logic" may be useful in determining the suitability of various types of respirators.

Hand protection

Glove material for example, butyl-rubber

Material thickness 0.5 mm
Break through time >= 480 min

Glove material for example, Fluorinated rubber (Viton)

Material thickness 0.4 mm

Break through time >= 480 min

Selection of protective gloves to meet the requirements of specific workplaces.

Suitability for specific workplaces should be clarified with protective glove manufacturers.

The information is based on our own tests, references from the literature and information from glove manufacturers, or derived by analogy with similar materials.

The above mentioned hand protection is based on knowledge of the chemistry and anticipated uses of this product but it may not be appropriate for all workplaces. A hazard assessment should be conducted prior to use to ensure suitability of gloves for specific work environments and processes prior to use.

Eye protection

Use chemical splash goggles or face shield.

Skin and body protection

A safety shower and eye wash fountain should be readily available.

To identify additional Personal Protective Equipment (PPE) requirements, it is recommended that a hazard assessment in accordance with the OSHA PPE Standard (29CFR1910.132) be conducted before using this product.

Hygiene measures

When using, do not eat, drink or smoke. Wash face and/or hands before break and end of work.

Remove contaminated or saturated clothing.

Wash contaminated clothing before re-use.

9. Physical and chemical properties

9.1. Information on basic physical and chemical properties

physical state liquid

Colour yellowish, slightly turbid

Form viscous liquid Odour acrylic-like

Odour Threshold not determined

pH 4.4 (1000 g/l) Medium: Water

Melting point/range not determined

Boiling point/range 99 °C (1013 hPa)

Flash point > 95 °C

Method: DIN EN ISO 2719 (Pensky-Martens, Closed Cup)

Evaporation rate not determined

Flammability (solid, gas) no data available

Lower explosion limit not determined

Upper explosion limit not determined

Vapour pressure not determined

Density 1.014 g/cm3 (20 °C)

Method: DIN 51757

Water solubility miscible

Partition coefficient: n-

octanol/water

not determined

Autoignition temperature not determined

Thermal decomposition not determined

Viscosity, dynamic 42.1 mPa.s (20 °C)

Method: DIN 53 015

9.2. Other information

no data available

10. Stability and reactivity

10.1. Reactivity

No dangerous reaction known under conditions of normal use.

10.2. Chemical stability

Stable under recommended storage conditions.

10.3. Possibility of hazardous reactions

Possibility of hazardous No dangerous reactions known.

reactions

10.4. Conditions to avoid

Protect from frost.

10.5. Incompatible materials

None known

10.6. Hazardous decomposition products

None known

Stable under normal conditions.

Product will not undergo hazardous polymerization.

13. Disposal considerations

13.1. Waste treatment methods

Product

Waste must be disposed of in accordance with federal, state, provincial and local regulations.

Uncleaned packaging

Packaging, that can not be reused after cleaning must be disposed or recycled in accordance with all federal, national and local regulations.

Incorrect disposal or reuse of this container is illegal and can be dangerous.

Other countries: observe the national regulations.

14. Transport information

Not dangerous according to transport regulations.

14.1. UN number: --

14.2. UN proper shipping name: --

14.3. Transport hazard class(es): --

14.4. Packing group: --

14.5. Environmental hazards (Marine

pollutant):

14.6. Special precautions for user: Yes

Not dangerous according to transport regulations.

15. Regulatory information

CERCLA Reportable Quantities

If listed below, a reportable quantity (RQ) applies to the product based on the percent of the named component:

None listed

SARA Title III Section 311/312 Hazard Categories

The product meets the criteria only for the listed hazard classes:

No SARA Hazards

SARA Title III Section 313 Reportable Substances

If listed below, components are subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:

None listed

Toxic Substances Control Act (TSCA)

If listed below, non-proprietary substances are subject to export notification under Section 12 (b) of TSCA:

None listed

Other US Federal Regulatory Information

This product contains a component that is subject to TSCA Significant New Use Rule (SNUR) which limits the application of the substance to surfaces via brush or roller.

The US EPA has issued a TSCA 5(e) Consent Order that allows for spray application of the product with a requirement of a respiratory program and a monitoring program.

These requirements can be fulfilled in collaboration with Evonik Industries. If a product containing the regulated component is distributed further, the distributor is required

to communicate the Consent Order requirements to the downstream users.

The proprietary substance is subject to export notification under section 12 (b) of TSCA. The Chemical Nature of this product is, Aqueous formula based on a fluoro-organo-functional polysiloxane, which is Nonhazardous under Classification according to Regulation 29CFR 1910.1200.

State Regulations

California Proposition 65

A warning under the California Drinking Water Act is required only if listed below:

1

WARNING: This product can expose you to the following chemical, which is known to the State of California to cause birth defects or other reproductive harm (For more information go to www.p65warning.ca.gov).

Methanol

CAS-No. 67-56-1

An employer using HMIS/NFPA labeling must through training ensure that its employees are fully aware of the hazards of the chemicals used.
