### 7.1 Precautions for safe handling:

#### 7.1.1 Protective measures:

Precautions for flammable organic dusts should be provided. Avoid high dust concentrations. Assure all equipment is properly grounded to prevent static discharges, and vented to provide for potential energy release. Control high dust concentrations while handling through the use of ventilation or other suitable controls.

#### 8.2.1 Appropriate engineering controls:

Use local exhaust ventilation if airborne concentrations are above recommended exposure limits.

Ingredient comments:

Dust contains respirable crystalline silica. Prolonged and/or massive inhalation of respirable crystalline silica dust may cause lung fibrosis, commonly referred to as silicosis. Principal symptoms of silicosis are cough and breathlessness.

Occupational exposure to respirable dust should be monitored and controlled.

The product should be handled using methods and techniques that minimise or eliminate dust generation. The product contains less than 1% w/w RCS (respirable crystalline silica) as determined by the SWERF method. The respirable crystalline silica content can be measured using the "Size-Weighted Respirable Fraction – SWERF" method. All details about the SWERF method is available at [www.crystallinesilica.eu](http://www.crystallinesilica.eu)

#### 8.2.2 Individual protection measures, such as personal protective equipment:

##### Eye/face protection:

Wear safety goggles to prevent eye exposure.

##### Skin protection

##### Hand protection:

Wear chemical resistant gloves to prevent skin exposure.

<b>Body protection:</b>	Wear suitable protective clothing to prevent skin exposure.
<b>Respiratory protection:</b>	Use an air-purifying dust respirator if airborne concentration levels are above exposure limits.
<b>Thermal hazards:</b>	Wear suitable protective clothing to prevent heat.
<b>8.2.3 Environmental exposure controls:</b>	Avoid discharge into the environment. According to local regulations, Federal and official regulations.
