### SECTION 7: Handling and storage

- **7.1 Precautions for safe handling**

Use gloves and safety glasses. Avoid contact with sources of ignition. Elevated processing temperatures may result in some degree of thermal degradation: as a guideline 200 °C is the maximum allowed temperature for very short time.  
During the processing of the product, avoid inhalation of fumes or powders, by providing good ventilation of the workroom and, if necessary, by a suitable exhaust system.  
Comply with personal hygiene measures and use the personal protective equipment (see chapter 8). Do not smoke, eat or drink in the workplace. Re-seal opened containers.
- Information about fire - and explosion protection:

The product is a poor conductor and it is likely to accumulate electrostatic charges. Precautions normally used for not conductive materials and against the accumulation of electrostatic charges should be used during processes which employ powdered materials or produce dust (e.g.: reduce speed to the minimum, install earthing systems, the absolute prohibition to smoke and use free flames, use inert gases in mills and in the closed systems).
- **7.2 Conditions for safe storage, including any incompatibilities**
  - Storage:

Store the product in a covered place in its sealed packaging, away from direct sunlight and heat sources.  
Ensure the proper ventilation in all storage areas.
  - Requirements to be met by storerooms and receptacles:

Not required.
  - Information about storage in one common storage facility:

None.
  - Further information about storage conditions:

No further relevant information available.
- **7.3 Specific end use(s)**

### SECTION 8: Exposure controls/personal protection

- Additional information about design of technical facilities:

No further data; see item 7.
- **8.1 Control parameters**
- Ingredients with limit values that require monitoring at the workplace:

The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.
- **8.2 Exposure controls**
  - General protective and hygienic measures:

Traces of monomers and other volatile substances may be given off during processing, particularly at unusually high processing temperatures.  
Work rooms must be provided with adequate ventilation and exhaust equipment to collect dust and gas/vapours that may be evolved during the conversion.
  - Suitable technical controls  
· Personal protection measures  
· Respiratory protection:

Ensure good ventilation / exhaustion at the workplace.  
The personal protective equipment will vary according to the possible exposure and danger of working conditions.  
In normal conditions masks with antidust filters should be available for use when requested.
