

B-2492

PRODUCT INFORMATION

Description

Ca / Zn Liquid Stabilizer

Typical Properties

Appearance:	Clear Yellow Liquid
Specific gravity at 20°C:	1.021 g/cm ³
Refractive Index at 20°C:	1.5090

Application

B-2492 is a cost effective, highly efficient Ca/Zn liquid stabilizer with good heat stability for use in PVC plastisol formulations and calendared PVC films.

B-2492 imparts excellent color hold at low used levels. It is recommended to use 0.3 to 0.5 phr. MC 3058 KA (solid booster) for calendared applications requiring better long term heat stability. B-2800 is suitable for some outdoor applications.

Recommended dosage: 2.0 to 4.0 phr, depending on application.

Food Packaging Approval

B-2492 may not be used for the manufacturing of food packaging materials.

Handling

A material safety data sheet for the handling of this product is available on request.

Storage

Storage at room temperature is recommended.
Liquid products may be affected by moisture and containers should be kept tightly closed.
