

# Safety Data Sheet

Date of issue : 2017/05/01 Date of revision: 2022/10/01

### **1. IDENTIFICATION**

Address:

Section: Telephone :

Product name :

Company name :

Aluminium paste FRIEND COLOR D111 RE TOYO ALUMINIUM K.K. 6-8, Kyutaromachi 3-chome, Chuo-ku, OSAKA, 541-0056, JAPAN Powder & Paste Team, Quality Assurance Unit +81-745-69-3489 +81-745-69-3091 Aluminium pigment for paint

### 4

Emergency telephone : Recommended uses :

2. HAZARD IDENTIFICATION		
[Hazard Classification] Physical Hazards	Flammable solids	Category1
Health Hazards	Skin corrosion or irritation	Category2
	Serious eye damage or eye irritation	Category2A
	Specific target organ toxicity - single exposure	Category3
		(respiratory irritation) Category3
	Specific target organ toxicity - repeated exposure	(anesthetizing) Category2
<b>F</b>		(central nervous system,lungs)
Environmental Hazards	Hazardous to the aquatic environment - acute	Category3
	Hazardous to the aquatic environment - chronic	Category3
Other Hazards	Not applicable	
Hazards that ar	en't written as the above are "Can't classify" or "Not C	assified."
[GHS Label elements]		
Pictogram		
Signal word	Danger	
	H228 Flammable solid	
	H315 Causes skin irritation	
	H319 Causes serious eye irritation	
	H335 May cause respiratory irritation	
	(respiratory irritation)	
	H336 May cause drowsiness or dizziness	
	(anesthetizing)	veneeted evee
	H373 May cause damage to organs through prolonged or	repeated exposure
	(central nervous system,lungs) H402 Harmful to aquatic life	
	H412 Harmful to aquatic life with long lasting effect	S
		-
Precautionary statements		
	P210 Keep away from heat, hot surfaces, sparks, open sources. No smoking.	flames and other ignition
	P261 Avoid breathing dust/fume/gas/mist/vapours/spray	'.
	P271 Use only outdoors or in a well-ventilated area.	
	P280 Wear protective gloves/protective clothing/eye p	rotection/face protection.
	P304+P340 IF INHALED: Remove victim to fresh air and	keep at rest in a position

P304+P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P312 Call a POISON CENTER or doctor/physician if you feel unwell.

P370+P378 In case of fire: Use metal fire powder for extinction.

P403+P233 Store in a well-ventilated place. Keep container tightly closed.

P405 Store locked up.

P501 Dispose of contents/container in accordance with applicable regulations.

Chemical Name	Composition (%)	ENCS (Japan)	CAS
Aluminium flake	38 ~ 44	-	7429-90-5
Naphtha (petroleum), hydrotreated heavy	20 ~ 25	9-1689	64742-48-9
Solvent naphtha (petroleum), light aromatic	19 ~ 24	9-1694	64742-95-6
Diketo-Pyrrolo-Pyrrole	7~9	5-5896	84632-65-5
Methacrylic acid polymer	5 ~ 7	6-2376	26426-04-0

#### 3. COMPOSITION/INFORMATION ON INGREDIENTS Substance/Mixture: Mixture

### 4. FIRST-AID MEASURES

IF INHALATION:

IF ON SKIN:

IF IN EYE:

IF SWALLOWED:

Protection of the person who gives the first aid:

### 5. FIRE-FIGHTING MEASURES

Extinguishing media: Unsuitable extinguishing media: Specific hazards:

Specific fire-fighting method:

Move victim to fresh air and keep at rest and get medical attention. Remove contaminated clothing/shoes, wash contaminated area with clean running water and soap. If inflammation or pain occurs, get medical attention/advice. Immediately rinse with plenty of clean running water for 15 minutes or more and get medical attention/advice. Not rub victim's eyes. In the case victim wears contact lenses, remove them if possible. Not force victim to vomit. If victim is consciousness, firstly rinse mouth with

water. If victim feels badly, get medical attention/advice. In case of inhalation, first aid provider should wear protective mask, in case

of skin contact, wear protective equipment such as rubber gloves. Wear protective glasses if necessary.

Powder extinguisher, carbon dioxide gas, dry sand, glass fiber clothing Water, extinguishing media containing water, halogen extinguishing media

May generate irritative and/or toxic gas by fire. Burn if intensively heated. May cause extremely dangerous explosion especially in closed environment (building, ware house etc.). Package may explode by heat. Dust or fume may form explosive mixture gas with air. May ignite by friction, heat, spark or flame. Use powder extinguisher or carbon dioxide gas at early stage of fire where only solvent is burning. At the final stage of fire, aluminum powder will ignite and burn with white light with releasing large heat. Try smothering extinguishment by covering the origin of fire by dry sand, glass cloth at this stage of fire. Continue smothering extinguishment until aluminum get cold because inside may be still burning without flame even when it seems to be extinguished. Treat or transport burned aluminum powder after confirming the inside temperature did not rise after one day. Product that is not burning should be removed promptly to safe place. Toyal 東洋7/L三

# 6. ACCIDENTAL RELEASE MEASURES

6. ACCIDENTAL RELEASE MEAS	URES
Personal precautions,	Wear appropriate protective equipment (see 8. Exposure control/personal
protective equipment and	protection) and avoid contact with eye/skin and inhalation of gas/dust.
emergency procedures:	If in doors, adequately ventilate until processing is complete.
Environmental precautions:	Do not release leakage to river or sewage directly.
Methods and materials for	Stop leakage, if safe to do so. When leaked from the package wipe with cloth
containment and cleaning up:	(waste cloth) and store in sealed package where no water, acid or alkali
	exists. Dispose of as industrial waste.
Drevention of cocordomy	
Prevention of secondary	Use equipment that do not cause spark. Avoid flowing into drainage, sewage or
disaster:	the basement and other closed places.
7. HANDLING AND STORAGE [Handling]	
Engineering measures:	Install equipment described in "8. EXPOSURE CONTROLS/PERSONAL PROTECTION"
	for local exhaust/total ventilation.
Special precautions:	Do not handle until all the safety precautions have been read and understood.
	Prohibit using high temperature material, spark or fire in surrounding area.
	Do not eat, drink or smoke when using this product.
	Wash the hands thoroughly after handling.
	Avoid swallow and contact with skin.
	Use only outdoors or in a well-ventilated area.
	Do not breathe dust, fume, gas, mist, vapor, spray.
	Install ventilation for exhaust to keep the concentration in the air below
	the exposure limit.
	Avoid release to the environment.
	In case package swells by abnormal inner pressure:
	-Package with degassing bulb on lid;
	Loosen the bulb gradually.
	Open after reducing pressure to the atmosphere pressure.
	-Package without degassing bulb on lid;
	Hold the lid so that it will not fly and decrease pressure by gradually
[0+]	loosening handle lever and open.
[Storage] Storage conditions:	In the store room, install the day lighting, lighting, and ventilating
	equipment needed for storing or handling the product.
	Apply the fireproof structure to walls, pillars and floors of the storage
	room.
	Use noncombustible material for beams.
	For floors of the storage room, apply a structure that prevents water
	influx/infiltration.
	Store away from ignition sources such as heat, spark or fireNo smoking.
	Store away from oxidizing agent.
	Store in sealed container at fixed place where protection from light and
	ventilation are adequate and temperature ( $\leq$ 40°C) and humidity are appropriate.
Container material:	Use containers specified by Fire Service Law or UN transport regulation.

# 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Administrative level, acceptable concentration limit

	Administrative level	Acceptable concentration limit	ACGIH		
Aluminium flake	_	Inhalation dust 0.5mg/m3 Total dust 2mg/m3	TWA:1mg/m3(R) STEL: -		
Naphtha (petroleum), hydrotreated heavy	-	-	TWA: -STEL: -		
Solvent naphtha (petroleum), light aromatic	-	-	TWA:25ppm STEL: -		
[Facility measures]	Use explosion-proof electrical/ventilating/lighting equipment.				
	When dust/fume/mist/gas is generated at high temperature install ventilation				
	equipment to keep concentration of air pollutant below administrative				
	level/acceptable concentration limit.				
	Handle in the place where total ventilation is installed.				
	General proper ventilation is good for control the concentration in the air.				
[Protective equipment]					
	In case ventilation is no	ot adequate, wear appropri	ate respiratory protectio		
	Use personal respiratory protective equipment as required.		equired.		
Hand :	Use personal protective gloves as required.				
Eye:	Wear appropriate eye protection.				
	Wear appropriate face protection.				
	Use personal antistatic protective clothing and protective mask as r		otective mask as required		
	Wash the hands thoroughly	<b>.</b> .			

# 9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state:	Solid (paste)		
Colour:	Metallic red		
Odour:	Petroleum odor		
Initial boiling point and boiling range:	If data is available,	it is described	below.
Flammability:	UN Class 4.1		
Explosion limit:	If data is available,	it is described	below.
Flash point:	If data is available,	it is described	below.
Auto-ignition temperature:	If data is available,	it is described	below.
Decomposition temperature:	N. A.		
pH:	N. A.		
Kinematic viscosity:	N. A.		
Vapor pressure:	If data is available,	it is described	below.
Relative density(g/cm3, calculted):	1. 2		
Relative vapour density:	N. A.		
Particle characteristics(D50)( $\mu$ m):	1–100		
Components Elash point (°C) Ignition	Initial Boiling	Vapour pressure	Density

Components	Flash point(°C)	Ignition point(°C)	Initial boiling	Boiling point(°C)	Vapour pressure	Density (Air=1)	Explosion	ı limit(%)
		point (C)	point (°C)	porne ( C)		(ATT = T)	Upper	Lower
Naphtha (petroleum), hydrotreated heavy	48(TAG closed- cup)	237	167	191	0.1kPa(20°C)	5.1	6.0	0.7
Solvent naphtha (petroleum), light aromatic	>40(Closed-cup)	470°C	155	155–180	-	4.2	6.5	0.5

### 10. STABILITY AND REACTIVITY

Stability:	Stable in air or under light shielded condition.
Hazardous/harmful reactivity:	React with water, acid, alkali, oxidizing agent metal oxide, halogen compound
	and generate hydrogen gas. Heat accelerates the reaction.
	Sealed container elevates inner pressure and may burst or the content may blow
	out and it is especially dangerous.
Conditions to avoid:	Organic solvent in the product may evaporate when temperature is elevated.
	Avoid contact with flame, spark, high temperature material and heating.
Incompatible materials:	Avoid contact with water, acid, alkali , oxidizing agent (peroxide, sulfuric
	acids etc), metal oxides (iron oxide etc.), halogen compounds (chlorine carbon
	hydrides).
Hazardous decomposition	May generate hydrogen gas.

products:

### **11. TOXICOLOGICAL INFORMATION**

Acute toxicity (oral)	Not applicable to category
Acute toxicity (dermal)	Not applicable to category
Acute toxicity (inhalation)	Not applicable to category
Skin corrosion or irritation	Category 2 is more than 10% and classified as Category 2.
Serious eye damage or eye irritation	Category 2A is more than 10% and classified as Category 2A.
Respiratory sensitization	Not applicable to category
Skin sensitization	Not applicable to category
Germ cell mutagenicity	Not applicable to category
Carcinogenicity	Not applicable to category
Reproductive toxicity	Not applicable to category
Specific target organ toxicity - repeated exposure	Category 2 is more than 1% and classified as Category 2. (central nervous system,lungs)
Specific target organ toxicity - single exposure	Category 3 is more than 20% and classified as Category 3. (anesthetizing)
	Category 3 is more than 20% and classified as Category 3. (respiratory irritation)
Aspiration hazard	Not applicable to category

## 12. ECOLOGICAL INFORMATION

Hazardous to the aquatic environment - acute	(Category 1 $\times$ 100) + (Category 2 $\times$ 10) +Category 3 is more than 25% and classified as Category 3.
Hazardous to the aquatic environment - chronic	(Category 1 $\times$ 100) + (Category 2 $\times$ 10) +Category 3 is more than 25% and classified as Category 3.
Hazardous to the Ozone Layer	Not applicable
Ecotoxicity: Fish	48h EC50 5.0-8.0mg/L (Solvent naphtha (petroleum), light aromatic)
Persistence and degradability:	No information at this point.
Bioaccumulation:	No information at this point.
Mobility in soil:	No information at this point.
Other hazards:	No information at this point.

#### 13. DISPOSAL CONSIDERATIONS

Disposal:	Do not reuse empty package.
	Do not put sealed container in a flame.
	Do not weld or melt down.When dispose of waste product and empty container
	commission to legally approved industrial waste disposer.
Contaminated container and	Confirm that there is not breakage, corrosion, leakage etc. of the package.
packing:	Pile containers in a way that does not cause falling, tumbling or breakage.
	Put appropriate cover to avoid direct sunlight and penetration of rain.
	Transfer the container avoiding significant friction or shaking.
	Pack, label and transfer according to related regulations.
14. TRANSPORT INFORMATION	
Land Transportation:	Comply with regulations. When the product significantly leak and there is a risk
	of fire during transportation take precautionary measures to prevent the fire
	and inform nearest fire service station.
Marine transportation:	Comply with regulations.
Air transportation:	Comply with regulations.
International regulation:	UN class: 4.1
	UN number : 1325
	Packing group II
	Proper shipping name : Flammable Solid, Organic, N.O.S.
	(Aluminium powder and petroleum mixture)

### **15. REGULATORY INFORMATION**

Ensure this material is on compliance with federal requirements and ensure it is conformity to local regulations.

## **16. OTHER INFORMATION**
