

S-21

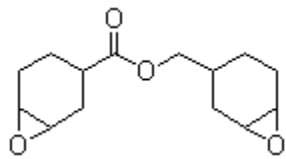

CAS No. 2386-87-0

DESCRIPTION

S-21 is a kind of alicyclic epoxy resin, equivalent to ERL4221 resin, giving outstanding performance in UV inks, UV coatings and other fields.

- UV curable
- Thermal curable with anhydrides
- Strong resistance to yellowing and UV light
- High TG

SPECIFICATION

S-21	
Appearance	Colorless to pale-yellowish liquid
Viscosity @ 25°C	300.0~450.0 CPS
Epoxy equivalent weight	131.0 ~ 143.0 g/Eq
Color (Pt-Co)	50 max.
Specific gravity @ 25°C	1.167 ~ 1.182 g/cm ³
Structure	

STORAGE AND HANDLING

- Store at room temperature
- Keep sealed and avoid moisture
- Avoid contamination with acidic or basic substances

Shelf life: 2 years
