

InCal[®] XFT

InCal[®] XFT is a remarkably pure and highly engineered treated ground calcium carbonate product with specifications designed to ensure performance in stringent, technical extrusion applications such as those found in the manufacture of vinyl profile and thin films.

Typical Chemical Composition		
Attribute	Value	Method
% CaCO_3	99.3 %	XRF
% Acid Insoluble Fraction	0.3 %	XRF
% Coating	1 %	Burn Off

Typical Particle Size Distribution		
Median	1.4 μm	Malvern – Alcohol
Topcut	8 μm	

Typical Color		
Brightness	95	Hunter L*
