SAFETY DATA SHEET

ExonMobil

ExxonMobil™ Data Center Immersion Fluid 3150

Section 1. Identification

Product name	: ExxonMobil™ Data Center Immersion Fluid 3150
Product description	: Synthetic Hydrocarbon
	the substance or mixture and uses advised against
Identified uses	: Cooling agents
Uses advised against	: This product is not recommended for any industrial, professional or consumer use other than the identified uses above.
Supplier	: ExxonMobil Product Solutions Company (a division of Exxon Mobil Corporation)
	SDS – LOC. 106
	22777 Springwoods Village Parkway Spring, TX_77389-1425_USA
24-Hour emergency	: 1-800-424-9300 / +1 703-741-5970 / +1-703-527-3887 (CHEMTREC)
telephone number	
Supplier General Contact	: (832) 624-8500
SDS Internet Address	: www.sds.exxonmobil.com
Section 2. Hazard	Is identification
OSHA/HCS status	 This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
Classification of the	: ACUTE TOXICITY (inhalation) - Category 4
substance or mixture	ASPIRATION HAZARD - Category 1
CUC label elemente	
GHS label elements	
Hazard pictograms	
Signal word	: Danger
Hazard statements	 H304 - May be fatal if swallowed and enters airways. H332 - Harmful if inhaled.
Precautionary statements	

	P2/1 - Use only outdoors or in a well-ventilated area.
Response	: P301 + P310, P331 - IF SWALLOWED: Immediately call a POISON CENTER or doctor. Do NOT induce vomiting.
	P304 + P312, P340 - IF INHALED: Call a POISON CENTER or doctor if you feel unwell. Remove person to fresh air and keep comfortable for breathing.
Storage	: P405 - Store locked up.
Disposal	: P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.
Contains	 1-decene, dimer hydrogenated; 1-decene dimer with dodecene, hydrogenated; 1-dodecene, dimer, hydrogenated; 1-dodecene, adducts with 1-octene (1:1), hydrogenated; 1-dodecene, adducts with 1-decene (1:1), hydrogenated and 1-decene, adducts with 1-octene (1:1), hydrogenated
Hazards not otherwise classified	: None known.

Section 2. Hazards identification

: This material should not be used for any other purpose than the intended use in Section 1 without expert advice. Health studies have shown that chemical exposure may cause potential human health risks which may vary from person to person.

Section 3. Composition/information on ingredients

Substance/mixture

: Mixture

Ingredient name	% by weight	CAS number
1-decene, dimer hydrogenated	≤100	68649-11-6
1-decene dimer with dodecene, hydrogenated	≤100	151006-58-5
1-dodecene, dimer, hydrogenated	≤100	151006-61-0
1-dodecene, adducts with 1-octene (1:1), hydrogenated	≤100	175134-91-5
1-dodecene, adducts with 1-decene (1:1), hydrogenated	≤100	175893-68-2
1-decene, adducts with 1-octene (1:1), hydrogenated	≤100	173994-68-8

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

N	ot	Δ

: The 0 - 100 wt% range for each CAS number reflects the possible concentration range of the ingredients in the mixture as the final product is a fungible variation that is dependent on the operating conditions of the manufacturing process.

Section 4. First aid measures

Description of necessary first aid measures			
Eye contact	 Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs. 		
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.		
Skin contact	 Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse. 		
Ingestion	: Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Aspiration hazard if swallowed. Can enter lungs and cause damage. Do not induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.		

Most important symptoms/effects, acute and delayed

Date of issue/Date of revision	: 28 September	Date of previous issue	: No previous edition	Version : 1	2/11
	2023				

Note

Section 4. First aid measures

Potential acute health effe	<u>cts</u>
Eye contact	: No known significant effects or critical hazards.
Inhalation	: Harmful if inhaled.
Skin contact	: No known significant effects or critical hazards.
Ingestion	: May be fatal if swallowed and enters airways.
Over-exposure signs/symp	<u>otoms</u>
Eye contact	: No specific data.
Inhalation	: No specific data.
Skin contact	: No specific data.
Ingestion	: Adverse symptoms may include the following: nausea or vomiting
Indication of immediate me	dical attention and special treatment needed, if necessary
Notes to physician	: If ingested, material may be aspirated into the lungs and cause chemical pneumonitis. Treat appropriately.
Specific treatments	: No specific treatment.
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

•	
Extinguishing media	
Suitable extinguishing media	: Use dry chemical, CO ₂ , water spray (fog) or foam.
Unsuitable extinguishing media	: Do not use water jet.
Specific hazards arising from the chemical	: In a fire or if heated, a pressure increase will occur and the container may burst. This material may cause long lasting harmful effects to aquatic life. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.
Hazardous combustion products	: Incomplete combustion products, Oxides of carbon, Smoke, Fume
Special protective actions for fire-fighters	: Use standard firefighting procedures and consider the hazards of other involved materials. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. Assure an extended cooling down period to prevent re-ignition. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water supply. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

NOTIFICATION PROCEDURES

In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. US regulations require reporting releases of this material to the environment which exceed the applicable reportable quantity or oil spills which could reach any waterway including intermittent dry creeks. The National Response Center can be reached at (800)424-8802.

Personal precautions, protective equipment and emergency procedures

Date of issue/Date of revision	: 28 September	Date of previous issue	: No previous edition	Version :1	3/11
	2023				

Section 6. Accidental release measures

For non-emergency personnel	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate.
For emergency responders	:	If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Environmental precautions	:	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.
Methods and materials for co	onta	ainment and cleaning up
Small spill	:	Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	:	Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Confine the spill immediately with booms. Remove from the surface by skimming or with suitable absorbents. Seek the advice of a specialist before using dispersants. Warn other shipping. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Water spill and land spill recommendations are based on the most likely spill scenario for this material; however, geographic conditions, wind, temperature, (and in the case of a water spill) wave and current direction and speed may greatly influence the appropriate action to be taken. For this reason, local experts should be consulted. Note: Local regulations may prescribe or limit action to be taken.

Section 7. Handling and storage

Precautions for safe handling : Put on appropriate personal protective equipment (see Section 8). Do not swallow. **Protective measures** Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. Advice on general : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, occupational hygiene drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. **Static Accumulator** : This material is a static accumulator. A liquid is typically considered a nonconductive, static accumulator if its conductivity is below 100 pS/m (100x10E-12 Siemens per meter) and is considered a semiconductive, static accumulator if its conductivity is below 10,000 pS/m. Whether a liquid is nonconductive or semiconductive, the precautions are the same. A number of factors, for example liquid temperature, presence of contaminants, anti-static additives and filtration can greatly influence the conductivity of a liquid.

Section 7. Handling and storage

Conditions for safe storage,	: Store in accordance with local regulations. Store in original container protected from
including any	direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials
incompatibilities	(see Section 10) and food and drink. Store locked up. Keep container tightly closed
	and sealed until ready for use. Containers that have been opened must be carefully
	resealed and kept upright to prevent leakage. Do not store in unlabeled containers.
	Use appropriate containment to avoid environmental contamination. See Section 10 for
	incompatible materials before handling or use.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
1-decene, dimer hydrogenated	ExxonMobil (Company).
	TWA: 1 mg/m ³ 8 hours. Form: Aerosols (thoracic fraction)
1-decene dimer with dodecene, hydrogenated	ExxonMobil (Company).
	TWA: 1 mg/m ³ 8 hours. Form: Aerosols (thoracic fraction)
1-dodecene, dimer, hydrogenated	ExxonMobil (Company).
	TWA: 1 mg/m ³ 8 hours. Form: Aerosols (thoracic fraction)
1-dodecene, adducts with 1-octene (1:1),	None.
hydrogenated	
1-dodecene, adducts with 1-decene (1:1),	ExxonMobil (Company).
hydrogenated	TWA: 1 mg/m ³ 8 hours. Form: Aerosols (thoracic fraction)
1-decene, adducts with 1-octene (1:1),	None.
hydrogenated	

NOTE: Limits/standards shown for guidance only. Follow applicable regulations.

Date of issue/Date of revision	: 28 September Date of previous issue : No previous edition Version : 1 5/1 2023
Body protection	: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Skin protection Hand protection	: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
Eye/face protection	: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.
Individual protection meas Hygiene measures	: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
controls	they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
Appropriate engineering controls Environmental exposure	 Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. Emissions from ventilation or work process equipment should be checked to ensure

Section 8. Exposure controls/personal protection

Other skin protection	 Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. Recommended: organic vapor filter (Type A)

Section 9. Physical and chemical properties and safety characteristics

Note: Physical and chemical properties are provided for safety, health and environmental considerations only and may not fully represent product specifications. Contact the Supplier for additional information.

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

<u>Appearance</u>	
Physical state	: Liquid. [Clear]
Color	: Colorless
Odor	: Mild
Odor threshold	: Not available.
рН	: Not applicable.
Melting point/freezing point	: <-20°C (<-4°F) [EU Method A.1]
Boiling point, initial boiling point, and boiling range	: 141 to 318°C (285.8 to 604.4°F) [EU Method A.2]
Flash point	: Closed cup: >140°C (>284°F) [ASTM D-93]
Evaporation rate	: Not available.
Flammability	: Ignitable
Lower and upper explosion limit/flammability limit	: Not available.
Vapor pressure	: <0.1 mm Hg [20 °C]
Relative vapor density	: Not available.
Relative density	: 0.8 [In-house method]
Solubility in water	: Negligible
Partition coefficient: n- octanol/water	: 10.02 to 11.07 [In-house method]
Auto-ignition temperature	: 228°C (442.4°F) [Extrapolated]
Decomposition temperature	: Not available.
Viscosity	: 5 cSt [40 °C] 2 cSt [100 °C]
Molecular weight	: 285
Particle characteristics	
Median particle size	: Not applicable.
Pour point	: <-50°C [In-house method]

Section 10. Stability and reactivity

Reactivity	: No specific test data related to reactivity available for this product or its ingredients.				
Chemical stability	: The produc	: The product is stable.			
Possibility of hazardous reactions	: Under norn	nal conditions of storage a	and use, hazardous reac	ctions will not occur	
Conditions to avoid	: High energ	y sources of ignition. Exc	essive heat.		
Date of issue/Date of revision	: 28 September 2023	Date of previous issue	: No previous edition	Version : 1	6/11

Section 10. Stability and reactivity

Incompatible materials : Strong oxidizers

 Hazardous decomposition
 : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Section 11. Toxicological information

Conclusion/Summary :

May be fatal if swallowed and enters airways. Based on physico-chemical properties of the material. Data available.

Other information

Product

: Small amounts of liquid aspirated into the lungs during ingestion or from vomiting may cause chemical pneumonitis or pulmonary edema.

Section 12. Ecological information

The information given is based on data for the material, components of the material, or for similar materials, through the application of bridging principals.

Toxicity

Product/ingredient name	Duration	Species	Result
ExxonMobil™ Data Center Immersion Fluid 3150	96 hours	Algae - Pseudokirchneriella subcapitata	Acute EL50 >1000 mg/l data for similar materials
	48 hours 96 hours 96 hours 96 hours	daphnia - Daphnia magna Fish - Oncorhynchus mykiss Algae - Pseudokirchneriella subcapitata Fish - Oncorhynchus mykiss	Acute EL50 >1000 mg/l data for similar materials Acute LL50 >1000 mg/l data for similar materials Acute NOEL >1000 mg/l data for similar materials

Hazardous Material Information System (U.S.A.)

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.
