## 7 Handling and storage

### Handling

Precautions for safe handling  
 Information about protection  
 against explosions and fires:

Provide vacuum dust collection if dust is formed.

The product is not flammable  
 Titanium dioxide product may be packaged at temperatures of  
 approximately 100 to 120 °C (212 to 248 °F) and stay hot for a long  
 time depending on ambient temperatures and inventory storage  
 practices. Due to the potential of elevated pigment temperature,  
 caution should be used while handling pigment and when used in  
 or near volatile solvent applications.

Conditions for safe storage, including any incompatibilities

Requirements to be met by  
 storerooms and receptacles:  
 Information about storage in  
 one common storage facility:  
 Further information about  
 storage conditions:

No special requirements.

Not required.

Store in dry conditions.

## 8 Exposure controls/personal protection

### Control parameters

Components with limit values  
 that require monitoring at the  
 workplace:

The following constituent is the only constituent of the product  
 which has a PEL, TLV or other recommended exposure limit.  
 At this time, the remaining constituent has no known exposure  
 limits.

CAS: 13463-67-7 Titanium dioxide

ACGIH - TLV Long-term value: 10 TWA, mg/m<sup>3</sup>  
 respirable fraction 1mg/m<sup>3</sup> TWA

OSHA - PEL Long-term value: 15\* 5\*\* mg/m<sup>3</sup>  
 \*total dust, \*\* inhalable dust, 8 hr TWA

### Exposure controls

Use local exhaust ventilation if airborne concentrations would  
 otherwise exceed applicable exposure limits.

### Personal protective equipment

General protective and hygienic  
 measures

The usual precautionary measures for handling chemicals should  
 be followed.

Titanium dioxide pigments are not irritant but as with all fine  
 powders can absorb moisture and natural oil from the surface of  
 the skin during prolonged exposure. Prolonged exposure and  
 potential skin absorption of TMP should be avoided by wearing  
 suitable protective gloves and clothing that covers the arms.

(Contd. on page 4)

Trade name: KRONOS Titanium Dioxide (grades containing TMP)

(Contd. of page 3)

	Store protective clothing separately.
<b>Breathing equipment:</b>	If workplace exposure limits are exceeded, use respiratory protection according to national regulations. The respirator must be selected by a technically qualified individual.
<b>Protection of hands:</b>	Use gloves appropriate for work conditions to minimize prolonged skin contact and potential skin absorption of TMP and prevent drying and subsequent irritation of skin. Check protective gloves prior to each use for their proper condition. Preventive skin protection by use of skin-protecting agents is recommended.
<b>Material of gloves:</b>	The selection of suitable gloves depends on the type of job, the characteristics of all substances to be handled and on further marks of quality, which may vary from manufacturer to manufacturer. If the product is used in a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application.
<b>Eye protection:</b>	Safety glasses
<b>Body protection:</b>	Wear long-sleeved protective work clothing.

information:****Titanium Dioxide**

On February 18, 2020, the European Union (EU) published the delegated regulation classifying certain powder titanium dioxide (TiO<sub>2</sub>) as a suspected carcinogen (Category 2) via inhalation under EU Regulation No 1272/2008 on classification, labelling, and packing (CLP) of substances and mixtures. Classification requirements will come into force on October 1, 2021, mandating hazard labels be placed on certain TiO<sub>2</sub> powder products and certain powder mixtures containing TiO<sub>2</sub> sold into the EU market. This classification of TiO<sub>2</sub> is not based on new science but instead on older scientifically questioned animal test data. Other studies and extensive data, including separate epidemiologic studies of TiO<sub>2</sub> workers, have shown no TiO<sub>2</sub>-specific links to cancer. TiO<sub>2</sub> has been characterized by IARC as possibly carcinogenic to humans (Group 2B) through inhalation (not ingestion). It has not been characterized as a potential carcinogen by either NTP or OSHA.

**Trimethylolpropane (TMP)**

Certain manufacturers of TMP self-classified the substance as a Category 2, suspected human reproductive toxicant (Repr. 2, H361 Suspected of damaging fertility or the unborn child) under the European Union's (EU) REACH regulation based on their interpretation of the results of an OECD 443 Extended One-Generation Reproduction Toxicity study in rats commissioned by those manufacturers. Taking into consideration the data from the study, the group also determined a new EU Derived No Effect Level (DNEL) for workers of 0.94 mg/kg/d (systemic, long-term, dermal route). TMP is contained in the specified TiO<sub>2</sub> products at less than 0.45 %. See Section 8 for recommended exposure control/personal protection.
