

B 2541

PRODUCT INFORMATION

Description

Ba / Zn Liquid Stabilizer

Typical Properties

Appearance:	Clear Amber Liquid
Specific gravity at 20°C:	1.03
Refractive Index at 20°C:	1.5172

Application

B-2541 is a cost effective, highly efficient general purpose Ba/Zn liquid stabilizer with very good heat stability for use in very flexible to semi-rigid PVC formulations. It is suitable for clear and pigmented applications.

B-2541 is designed for plastisol applications requiring excellent long term heat stability but is suitable for most production processes..

B-25415 has very mild lubrication properties and can be used with or without additional lubricants. It offers good plate-out resistance at minimum use levels and Good hydrolysis resistance.

Recommended dosage: 2.5 to 4.5 phr, depending on application.

Food Packaging Approval

B-2541 may not be used for the manufacturing of food packaging materials.

Handling

A material safety data sheet for the handling of this product is available on request.

Storage

Dry storage at room temperature is recommended.
Once opened, packaging should be firmly closed.
