Storage

If correctly stored and kept in the original sealed container, the shelf life is at least 24 months.
Components of the product may crystallise at storage temperatures below 0°C.
These dissolve again when heated and stirred.

Further Information

The safety data sheet 694006 should be observed. This contains further information on labelling, transport and storage as well as information on handling, product safety and ecology. For additional technical information see "Product Information".

This information, with the exception of the data given in section "Specification", and our technical advice - whether verbal, in writing or by way of trials - are given in good faith but without warranty, and this also applies where proprietary rights of third parties are involved. Our advice does not release you from the obligation to check its validity and to test our products as to their suitability for the intended processes and uses. The application, use and processing of our products and the products manufactured by you on the basis of our technical advice are beyond our control and, therefore, entirely your own responsibility. Our products are sold in accordance with our GeneralConditions of Sale and Delivery.
