

# COTIOX KA-100

## TECHNICAL DATA SHEET

### ■ Applications

- Papers
- Rubber
- Paint/Coatings & Inks
- Ceramics and etc.

### ■ Properties

#### COTIOX KA 100 Titanium Dioxide

- is an untreated Anatase TiO<sub>2</sub> that is easily dispersed
- has good hiding power and tinting strength
- imparts high brightness and a neutral tone

### ■ CLASSIFICATION

- Production anatase pigment produced by the sulphate process
- Surface treatment Organic substance
- TiO<sub>2</sub> content (KS M ISO 591) 98.0% min
- pH 7.0 ~ 8.5
- Moisture 0.40% max
- Residue (325Mesh) 0.015% max
- Particle Size 0.25~0.35 $\mu$ m
- Density (KS M ISO 787-10) 3.8 g/cm<sup>3</sup>
- Colour index Pigment White 6 (77891)
- CAS No 13463-67-7

### ■ Safety precautions

Please see the Material Safety Data sheet before handling the material.

The manufacture of Cosmo products is within the scope of the ISO 9001 certified Quality Management System.

The plant also has the ISO 14001 certified Environmental Management System.

### ■ Package type

Available in 25kg paper bag and 500kg/1,000kg poly bag
