

Roflex T45

CHEMICAL NAME Modified Aryl Phosphates

FUNCTION Emollient, Plasticizer

TECHNICAL REQUIREMENTS

Acid Value, mgKOH/g	0.1 Maximum
Density @ 25°C.....	1.02-1.06
Viscosity @ 25°C, mPa's.....	35-70
Appearance @ 20-25°C.....	Homogeneous Clear Liquid

GENERAL DATA

Molecular Weight, g/mol.....	326-494
Flash Point, °C	200 Minimum
Solubility (aqueous).....	Insoluble
Odor.....	Weak Ester

APPLICATION Roflex T45 is used in the plastics industry as an emollient (plasticizer).

Revision Date: 2925.10.2022
