# Section 4 - FIRST AID MEASURES

#### EYE

Flush eye with water. Seek medical attention if necessary.

#### SKIN

If contact with hot material, cool the burn area by flushing with large amounts of water. DO NOT attempt to remove anything from the burn area or apply burn creams or ointments. Cover the burn area loosely with a sterile dressing, if available and seek medical attention.

#### **INHALED**

At ambient temperature inhalation is unlikely because of the low vapour pressure of the substance. If fumes or combustion products are inhaled remove from contaminated area. Seek medical attention in event of irritation.

#### **SWALLOWED**

Immediately give a glass of water. First aid is not generally required. If in doubt, contact a Poisons Information Centre or a doctor.

#### **NOTES TO PHYSICIAN**

Treat symptomatically.

#### Section 5 - FIRE FIGHTING MEASURES

#### **SUITABLE EXTINGUISHING MEDIA:**

Foam, water spray or fog, dry chemical powder, carbon dioxide, sand or earth. Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only.

#### **UNSUITABLE EXTINGUISHING MEDIA:**

None

#### **SPECIAL HAZARDS:**

Combustible solid which burns but propagates flame with difficulty. Slight fire hazard when exposed to heat or flame. Heating may cause expansion or decomposition leading to violent rupture of containers. On combustion, may emit acrid fumes of carbon monoxide (CO), carbon dioxide (CO2), other pyrolysis products typical of burning organic material.

# SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS.

Glasses: Chemical goggles

Gloves: Chemical protective gloves.

Respirator: Self-sustained breathing apparatus

# **Section 6 - ACCIDENTAL RELEASE MEASURES**

# PERSONAL PRECAUTIONS

Remove ignition sources. Avoid generating dust. Control personal contact by using protective equipment. Personal protective equipments refer to Section 8.

#### METHODS FOR CLEANING UP

For small spillage, shovel up for subsequent safe disposal as required by local, international or country specific regulations.

For large spillage, ransfer to a labeled, sealable container for product recovery or safe disposal as required by local, international or country specific regulations.

# **ENVIRONMENTAL PRECAUTIONS**

Prevent the material or washing water entering water environment.

# Section 7 - HANDLING AND STORAGE

#### **HANDLING**

Stack in a row and keep in a space. Keep container dry. Keep in a dry, clean, and well-ventilated place. Keep away from direct sunlight and other sources of heat or ignition. Avoid accumulation of product in air. Avoid storage exceeding guarantee period. Incompatibility information as indicated in Section 10.

#### **STORAGE**

Avoid generation or accumulation of dusts. Take precautionary measures against static discharges, earth/ground all equipment. Avoid contact with heated or molten product. Do not breathe dust, fumes or vapors from heated product. Use local exhaust ventilation in processing area. Take precautionary measures against direct sunlight and rain drenching during transport. Keep transportation vehicle clean. Avoid packaging destruction and keep away from impurity. Incompatibility information as indicated in Section 10.

#### **SPECIFIC USE**

None

# Section 8 - EXPOSURE CONTROLS / PERSONAL PROTECTION

# **EXPOSURE LIMIT VALUES**

ACGIH: None listed NIOSH: None listed OSHA: None listed IOELVs: None listed WELs: None listed

Rubber manufacturing and processing giving rise to rubber dust and rubber fume.

Rubber fume: MEL/TWA=0.6mg/m3 (8h)

Rubber process dust: MEL /TWA (8h) =6mg/m3

# **ENGINEERING CONTROLS**

General exhaust is adequate under normal operating conditions. Local exhaust ventilation may be required in specific circumstances. If risk of overexposure exists, wear approved respirator. Correct fit is essential to obtain adequate protection. Provide adequate ventilation in warehouse or closed storage areas. Air contaminants generated in the workplace possess varying "escape" velocities which, in turn, determine the "capture velocities" of fresh circulating air required to effectively remove the contaminant.

# **EXPOSURE CONTROLS**

#### RESPIRATORY PROTECTION

Use a European Standard EN 149 approved respirator if exposure limits are exceeded or if irritation or other symptoms are experienced.

# HAND PROTECTION

Use chemical protective gloves (polyethylene, PVC).

#### **EYE PROTECTION**

Use chemical goggles

#### **SKIN PROTECTION**

Wear appropriate protective clothing to prevent skin exposure.

# **ENVIRONMENTAL EXPOSURE CONTROLS**

SIS 3/6

Local exhaust ventilation usually required. As much as possible, keep from being washed into surface waters.
