

ROYALE BLACK[®] P353

PRODUCT PROFILE

P353 is a cost-effective opacifying agent for pipe monolayer films and moulding applications requiring low weatherability. Due to low grit content, the product provides low filterability index and offers good dispersibility.

P353 is also used in synthetic paints application which demands blue undertone. This product is commonly used as a supplementary carbon source for graphitized products, such as carbon brushes.

The dispersibility of P353 depends on the equipment used and the formulation.

TYPICAL VALUE

NSA m ² /g	STSA m ² /g	OAN cc/100g	Tint Strength % ITRB	Sieve Residue 325M, ppm	Heating Loss (As Shipped) %
35	33	90	60	45	0.6

APPLICATION FIELD

TYPICAL APPLICATION	RECOMMENDED DOSAGE
Plastic Masterbatches	Upto 52%

- Recommended dosage can vary depending upon end use and modification of other ingredients
- Packaging - 25kg paper bag or 500/1000kg bulk bag
