

## Dibutyl Sebacate

Dibutyl Sebacate (DBS) is a specialty plasticizer that provides excellent compatibility and superior low temperature properties to a variety of polymers. The low temperature advantages of DBS make this material an ideal choice for vinyl food contact films used in refrigeration.

product identification	CAS Number	109-43-3
	Molecular Weight	314.4 g/mol
typical properties	Appearance	Clear liquid
	Viscosity	9.5 cP @ 25 °C
	Pour Point	-11 °C
	Specific Gravity	0.94
	Solubility	Soluble in acetone, ethanol, hexane, isopropanol, and toluene. Insoluble in water.
applications	Coatings, films, and articles that include such resins as vinyls, acrylics, nitrile rubber, Buna-N rubber, as well as some cellulose.	

Revised 29-July-24

Consult the Safety Data Sheet for hazard and regulatory information

Information contained in this technical data sheet is believed to be accurate. Aurorium assumes no liability and makes no warranty or representation that the information is correct or complete. Final determination of suitability of any material and issues of patent infringement is the sole responsibility of the user who alone knows the conditions of intended use. Our customers should ensure that any product incorporating an Aurorium ingredient is safe for its intended use pursuant to applicable law and that any necessary disclosures to consumers have been made.
