

LOTRYL[®] MM1297

LOTRYL[®] MM1297 is a process masterbatch based on ethylene-methyl acrylate copolymer.

LOTRYL[®] MM1297 is designed to modify surface properties of methyl acrylate copolymers with high comonomer content. It is active at molten state to prevent inner faces from sticking in blown film extrusion, and at solid state to give outstanding anti-block and slip properties.

Typical Properties

	Test Method	Unit	Typical Value
Melt Index (190°C/2.16kg)	ISO 1133 / ASTM D1238	g/10min	8
Density	ISO 1193 / ASTM D150	g/cm ³	1.4

Processing

LOTRYL[®] MM1297 masterbatch is available in pellet form for use in conventional extrusion equipment designed to process polyolefin.

The recommended use rate is from 2% to 4% in weight.

Storage, Handling & Safety

LOTRYL[®] MM1297 should be stored in standard conditions and protected from UV-light. Improper storage conditions may cause degradation and could have consequences on physical properties of the product.

Safety data sheet as well as information on handling and storage are available upon request to your SK Functional Polymer representative.

Shelf Life

Three years from the date of delivery, in unopened packaging. For any use above this limit, please refer to our technical services.

The information above is believed to be accurate and represents the best information currently available to us. Your attention is directed to the pertinent Material Safety Data Sheets for the products mentioned herein. All sales are subject to SK Corporation's standard terms and conditions of sale, copies of which are available upon request and which are part of SK Functional Polymer invoices and/or order acknowledgments.
