TOXICITY AND SAFETY

For information on the toxicity and safe handling of this product, please read the Safety Data Sheet prior to use of the product.

HANDLING AND STORAGE

TERMUL[®] 3150 surfactant may be satisfactorily stored in carbon steel tanks using steel pipes and pumps although 304 or 316 stainless steel is recommended. If carbon steel is used, caution must be exercised to keep the material in the anhydrous state to prevent severe corrosion to the carbon steel tank and related equipment. A drier on the breathing nozzle is recommended to help maintain anhydrous conditions in the storage tank.

For longer term color stability, it is recommended that the product be stored under an inert atmosphere. Solid sediment may form upon standing. There should be circulation in the storage vessel to keep solids suspended.

Low pressure steam coils in storage tanks and steam tracing of transfer lines should be provided.

SHIPPING DATA

Product is available in tank cars, tank trucks and drums of 500 pounds (227 kilograms) net weight. Small samples can be obtained by contacting any Indorama Ventures sales office.
