Wear protective glasses if necessary.

#### 3. COMPOSITION/INFORMATION ON INGREDIENTS Substance/Mixture: Mixture

#### 4. FIRST-AID MEASURES

IF INHALATION: IF ON SKIN:

IF IN EYE:

IF SWALLOWED:

Move victim to fresh air and keep at rest and get medical attention. Remove contaminated clothing/shoes, wash contaminated area with clean running water and soap. If inflammation or pain occurs, get medical attention/advice. Immediately rinse with plenty of clean running water for 15 minutes or more and get medical attention/advice. Not rub victim's eyes. In the case victim wears contact lenses, remove them if possible. Not force victim to vomit. If victim is consciousness, firstly rinse mouth with

In case of inhalation, first aid provider should wear protective mask, in case

### 5. FIRE-FIGHTING MEASURES

Extinguishing media: Unsuitable extinguishing media: Specific hazards:

Specific fire-fighting method:

Powder extinguisher, carbon dioxide gas, dry sand, glass fiber clothing Water, extinguishing media containing water, halogen extinguishing media

water. If victim feels badly, get medical attention/advice.

of skin contact, wear protective equipment such as rubber gloves.

May generate irritative and/or toxic gas by fire.Burn if intensively heated. May cause extremely dangerous explosion especially in closed environment (building, ware house etc.).Package may explode by heat.Dust or fume may form explosive mixture gas with air.May ignite by friction, heat, spark or flame. Use powder extinguisher or carbon dioxide gas at early stage of fire where only solvent is burning.At the final stage of fire, aluminum powder will ignite and burn with white light with releasing large heat. Try smothering extinguishment by covering the origin of fire by dry sand, glass cloth at this stage of fire. Continue smothering extinguishment until aluminum get cold because inside may be still burning without flame even when it seems to be extinguished.Treat or transport burned aluminum powder after confirming the inside temperature did not rise after one day.Product that is not burning should be removed promptly to safe place.

# 6. ACCIDENTAL RELEASE MEASURES

| 6. ACCIDENTAL RELEASE MEAS         | URES  |
|------------------------------------|---|
| Personal precautions,              | Wear appropriate protective equipment (see 8. Exposure control/personal                       |
| protective equipment and           | protection) and avoid contact with eye/skin and inhalation of gas/dust.                       |
| emergency procedures:              | If in doors, adequately ventilate until processing is complete.                               |
| Environmental precautions:         | Do not release leakage to river or sewage directly.   |
| Methods and materials for          | Stop leakage, if safe to do so. When leaked from the package wipe with cloth                  |
| containment and cleaning up:       | (waste cloth) and store in sealed package where no water, acid or alkali                      |
|                                    | exists. Dispose of as industrial waste.   |
| Drovention of ecoendary            |   |
| Prevention of secondary            | Use equipment that do not cause spark. Avoid flowing into drainage, sewage or                 |
| disaster:                          | the basement and other closed places.   |
| 7. HANDLING AND STORAGE [Handling] |   |
| Engineering measures:              | Install equipment described in "8. EXPOSURE CONTROLS/PERSONAL PROTECTION"                     |
|                                    | for local exhaust/total ventilation.  |
| Special precautions:               | Do not handle until all the safety precautions have been read and understood.                 |
|                                    | Prohibit using high temperature material, spark or fire in surrounding area.                  |
|                                    | Do not eat, drink or smoke when using this product.   |
|                                    | Wash the hands thoroughly after handling.   |
|                                    | Avoid swallow and contact with skin.  |
|                                    |   |
|                                    | Use only outdoors or in a well-ventilated area.   |
|                                    | Do not breathe dust, fume, gas, mist, vapor, spray.   |
|                                    | Install ventilation for exhaust to keep the concentration in the air below                    |
|                                    | the exposure limit.   |
|                                    | Avoid release to the environment.   |
|                                    | In case package swells by abnormal inner pressure:  |
|                                    | -Package with degassing bulb on lid;  |
|                                    | Loosen the bulb gradually.  |
|                                    | Open after reducing pressure to the atmosphere pressure.                                      |
|                                    | -Package without degassing bulb on lid;   |
|                                    | Hold the lid so that it will not fly and decrease pressure by gradually                       |
|                                    |   |
|                                    | loosening handle lever and open.  |
| [Storage]<br>Storage conditions:   | In the store room, install the day lighting, lighting, and ventilating                        |
| Storage conditions.                |   |
|                                    | equipment needed for storing or handling the product.   |
|                                    | Apply the fireproof structure to walls, pillars and floors of the storage                     |
|                                    | room.   |
|                                    | Use noncombustible material for beams.  |
|                                    | For floors of the storage room, apply a structure that prevents water                         |
|                                    | influx/infiltration.  |
|                                    | Store away from ignition sources such as heat, spark or fireNo smoking.                       |
|                                    | Store away from oxidizing agent.  |
|                                    | Store in sealed container at fixed place where protection from light and                      |
|                                    | ventilation are adequate and temperature ( $\leq 40^{\circ}$ C) and humidity are appropriate. |
| Container material:                | Use containers specified by Fire Service Law or UN transport regulation.                      |
|                                    | oso oontamore epecifica by the octator Law of ON transport regulation.                        |

# 10. STABILITY AND REACTIVITY

| Stability:                    | Stable in air or under light shielded condition.   |
|-------------------------------|--|
| Hazardous/harmful reactivity: | React with water, acid, alkali, oxidizing agent metal oxide, halogen compound and generate hydrogen gas. Heat accelerates the reaction.                                |
|                               | Sealed container elevates inner pressure and may burst or the content may blow out and it is especially dangerous.   |
| Conditions to avoid:          | Organic solvent in the product may evaporate when temperature is elevated.<br>Avoid contact with flame, spark, high temperature material and heating.                  |
| Incompatible materials:       | Avoid contact with water, acid, alkali , oxidizing agent (peroxide, sulfuric acids etc), metal oxides (iron oxide etc.), halogen compounds (chlorine carbon hydrides). |
| Hazardous decomposition       | May generate hydrogen gas.   |

# **11. TOXICOLOGICAL INFORMATION**

| Acute toxicity (oral)                                 | Not applicable to category   |
|---|--|
| Acute toxicity (dermal)                               | Not applicable to category   |
| Acute toxicity (inhalation)                           | Not applicable to category   |
| Skin corrosion or irritation                          | Category 2 is more than 10% and classified as Category 2.                                  |
| Serious eye damage or eye<br>irritation               | Category 2A is more than 10% and classified as Category 2A.                                |
| Respiratory sensitization                             | Not applicable to category   |
| Skin sensitization                                    | Not applicable to category   |
| Germ cell mutagenicity                                | Not applicable to category   |
| Carcinogenicity                                       | Not applicable to category   |
| Reproductive toxicity                                 | Not applicable to category   |
| Specific target organ toxicity -<br>repeated exposure | Category 2 is more than 1% and classified as Category 2.<br>(central nervous system,lungs) |
| Specific target organ toxicity -<br>single exposure   | Category 3 is more than 20% and classified as Category 3.<br>(anesthetizing)               |
|   | Category 3 is more than 20% and classified as Category 3.                                  |
|   | (respiratory irritation)   |
| Aspiration hazard                                     | Not applicable to category   |

# 12. ECOLOGICAL INFORMATION

| Hazardous to the aquatic<br>environment - acute   | (Category 1 $\times$ 100) + (Category 2 $\times$ 10) +Category 3 is more than 25% and classified as Category 3. |
|---|---|
| Hazardous to the aquatic<br>environment - chronic | (Category 1 $\times$ 100) + (Category 2 $\times$ 10) +Category 3 is more than 25% and classified as Category 3. |
| Hazardous to the Ozone Layer                      | Not applicable  |
| Ecotoxicity:<br>Fish                              | 48h EC50 5.0-8.0mg/L (Solvent naphtha (petroleum), light aromatic)  |
| Persistence and degradability:                    | No information at this point.   |
| Bioaccumulation:                                  | No information at this point.   |
| Mobility in soil:                                 | No information at this point.   |
| Other hazards:                                    | No information at this point.   |

#### 13. DISPOSAL CONSIDERATIONS

| 13. | DISPUSAL CUNSIDERATION     |  |
|-----|----------------------------|--|
|     | Disposal:                  | Do not reuse empty package.  |
|     |                            | Do not put sealed container in a flame.  |
|     |                            | Do not weld or melt down.When dispose of waste product and empty container       |
|     |                            | commission to legally approved industrial waste disposer.                        |
|     | Contaminated container and | Confirm that there is not breakage, corrosion, leakage etc. of the package.      |
|     | packing:                   | Pile containers in a way that does not cause falling, tumbling or breakage.      |
|     |                            | Put appropriate cover to avoid direct sunlight and penetration of rain.          |
|     |                            | Transfer the container avoiding significant friction or shaking.                 |
|     |                            | Pack, label and transfer according to related regulations.                       |
|     |                            |  |
| 14. | TRANSPORT INFORMATION      |  |
|     | Land Transportation:       | Comply with regulations. When the product significantly leak and there is a risk |
|     |                            | of fire during transportation take precautionary measures to prevent the fire    |
|     |                            | and inform nearest fire service station.   |
|     | Marine transportation:     | Comply with regulations.   |
|     | Air transportation:        | Comply with regulations.   |
|     | International regulation:  | UN class : Not applicable  |
|     |                            | UN number : -  |
|     |                            | Packing group -  |
|     |                            | Proper shipping name : Not applicable  |
|     | Marine Pollutant:          | Not applicable   |

#### **15. REGULATORY INFORMATION**

Ensure this material is on compliance with federal requirements and ensure it is conformity to local regulations.
