

# InCal<sup>®</sup> 2T

InCal<sup>®</sup> 2T is a remarkably pure and highly engineered treated ground calcium carbonate product with specifications designed to ensure performance in stringent, technical applications such as those found in the manufacture of thin films, fibers, extruded profiles, blow molded parts and injection molded products.

Typical Chemical Composition		
Attribute	Value	Method
% $\text{CaCO}_3$	99.3 %	XRF
% Acid Insoluble Fraction	0.3 %	XRF
% Coating	1 %	Burn Off
Typical Particle Size Distribution		
Median	2.4 $\mu\text{m}$	Malvern – Alcohol
Topcut	11 $\mu\text{m}$	
Typical Color		
Brightness	94	Hunter L*
