**TECHNICAL DATA SHEET**

**ZINC OXIDE USP GRADE 102 USP**

**Description**

Our Zinc Oxide USP product is produced by the French (Indirect) Process and meets the most stringent medicine safety laws and standards in the world including:

- API (Active Pharmaceutical Ingredient),
- GMP (Good Manufacturing Practices) ICH Q7,
- USP, EP, BP & other Compendium Monographs.

Grade 102 USP offers the highest m<sup>2</sup>/g surface area (SA) available with high quality French Process material, and is used when standard grade 112 USP is not suitable in the application.

Grade 102 USP replaces Grades ZOCO 102 USP (Std) and KADOX USP-1.

**Product Selection**

Zochem offers several FDA approved grades:

- 103 USP (low 2-4 m<sup>2</sup>/g surface area "SA"),
- 112 USP (medium 3-6.5 SA),
- 101 USP (higher 6-8.5 SA),
- 102 USP (highest 8-10 SA),
- 112 EP-BP (European Union/British Pharmacopeias), the proper API GMP pharma grade for use outside the U.S.A.
- 104 is USFDA approved as GRAS (Generally Recognized As Safe) at 21cfr73.8991 and used for OTC, excipient (inactive ingredient), and wherever an FDA approved grade is required.
