

Baeropan SP 93015 P

Description Free-flowing beige to tan colored prill wax lubricant for rigid PVC.

Properties	<u>Test</u>	<u>Typical Property</u>
	Ash Content	18.8%
	Loss on Drying	<1%
	Melting range	102-105°C

Applications Baeropan SP 93015 P is a prill form solid lubricant for use in rigid PVC applications with excellent handling and feeding characteristics and is especially suited for ease of blending and compounding with resin, filler and other additive components of thermoplastic formulations.

Baeropan SP 93015 P is formulated for high output PVC extrusion. It provides optimal fusion that promotes homogeneous dispersion of medium to high filler levels. Baeropan SP 93015 P incorporates co-stabilizing additives directly into the process that can act as a booster to increase long term heat stability.

Dosage General dosage is recommended to start from 2.0-2.75 PHR depending on application and formulation.

Quality control A state-of-the-art plant process with strict control ensures consistent quality in chemical and physical properties.

Packaging Standard bulk packaging in supersacks and palletized multi-wall paper bags are available.

Storage Store in dry areas at normal ambient temperatures is recommended. Open containers of unused product should be firmly closed for storage.
